About Me

Since an early age, I have always had an affinity for technology and aspired to positively **impact** people's lives through it. Throughout my journey, I have gone through several experiences where I developed both my personal and professional skills so that one day I could achieve this goal. That is why I remain committed to **learning** new things, **sharing** my knowledge with others, and **challenging** myself more each day.

Academic Background

- Bachelor's Degree in Software Engineering – Federal University of Ceará | 2021 – 2025
- Technical course in Mechanics – Osmira Eduardo de Castro State Education School | 2018 – 2021

Professional Experience

Realize Software

Jr. Full Stack Developer | Mar. 2025 – present

I work on the development of systems for the industrial, pharmaceutical, and healthcare sectors, focusing on **modern** and **responsive interfaces**. On the backend, I aim to apply best practices in **software architecture** while ensuring integration with **scalable APIs**. I contribute to improving user experience and **optimizing** internal **processes**.

Up Value Solutions

Front End Developer | Dec. 2023 – Feb. 2025

I participated in the development and **prototyping** of web and mobile applications. I collaborated with multidisciplinary teams, enhancing my skills in **teamwork** and agile methodologies (**Scrum/Kanban**), while expanding my expertise in building mobile solutions.

Extracurricular Experience

Programa de Educação Tutorial – PET

Scholarship Recipient | Mar. 2022 – Mar. 2025

As a member of the program, I developed essential interpersonal skills for the job market, such as **leadership**, **proactivity**, **assertive communication**, **collaboration**, and **analytical thinking**. I also worked across the full software development lifecycle, from ideation and prototyping (Figma) to implementation. This experience allowed me to combine soft skills with technical hard skills, strengthening my ability to deliver projects from start to finish.

Technologies

- Frontend: React, React Native, TypeScript, JavaScript, Tailwind and Next.js
- Backend: Node.js, Prisma ORM and Mongoose
- Databases: PostgreSQL and MongoDB
- Frameworks & Libraries: Express and Axios
- Services: MQTT
- Infrastructure & DevOps: Docker

Interpersonal Skills

- Proactivity
- Dedication
- Teamwork
- Assertive communication
- Leadership
- Analytical thinking
- Responsibility
- Intermediate English (B1-B2)
